

Scenario 17: RV (Brescia-) Como S.G. - Intragna

(17 JC) -- RV (Brescia-)
Como S.G. - Intragna

Engine: FS Pilota MDVC

Max speed: 120 km/h

Service: Squinzano-Intragna

Information:

2010. You drive a RV (Regionale Veloce) from (Brescia-) Como to Intragna. Your train will be hauled by a E633 and a E656. In addition to that, these engines haul a historic E444 and a grey UIC-X coach to Intragna. It's winter, but on this february morning the sun is shining. A broken engine and a delayed oncoming train cause some trouble for you. Try reach Intragna on time.

Signalling problems:

Intragna's main signal isn't working. In Squinzano the max speed is only 30km/h (because of a broken engine).

Further informations:

- Please install all rolling stock from the „BasicRollingStock.pdf“ file. This rolling stock is used in this particular scenario and as well in future scenarios. Please note that you eventually need to download additional rolling stock for this scenario.
