

BR 193 Repaintpack extension

This small extension Repaintpack adds 3 LTE and 1 TX Logistik Repaint to the existing [RDF_RS]Vectron Repaintpack. These repaints were created some time ago, but have never been published since then. The [\[RDF_RS\] BR 193 Repaintpack V3](#) must be installed.

The following Repaints will be added: 193 280 „3 Flames“, 193 657 TXL Pferde (Schwarz) 193 694 „MOVEO ERGO SUM.“ und 193 697 „COGITO ERGO MOVEO.“

I would like to thank everyone who has worked directly or indirectly on this package: BR650/001, Giaramses, Aaron, Brackwedebey, Karisma, EN491 and Bernhard S. Thanks also to everyone who pointed out bugs or tested the package. Many thanks also to LTE and Loc & More for their support and Dominick Chaloupka for the permission to upload the main Repaintpack.

Requierd Add-ons Payware and Freeware:

[Vectron – class 193](#) + [Vectron class 193 - reskins](#) + [\[RDF_RS\] BR 193 Repaintpack V3](#)

Installation:

Open the 7z file with a rar or zip program and move the folder to the Railworks folder. Confirm overwriting if necessary. The installation with utilities also works. At the end, do not forget to clear the TS cache. Moving GeoPcDx files is not needed.

Disclaimer:

We are not responsible for any damage to soft- or hardware while or after installing our repaint pack.
We are also not responsible for the content that is displayed on the linked sites.
It is not allowed to publish to other sites. Also, it is not allowed to reuse things from this repaint pack for other projects or change and upload the repaint pack without permission.
