Vectron Repaint Pack all. Readme ENG

Repaint pack needs Vectron Starter Pack for it to function.

To the model there have been installed new suplements, and those are:

- New sensors on bogies
- 2D ventilation grids on the roof
- new bumper (cover around bumpers)
- new acessorieson the roof
- new decals

These suplements are applied on the model with cooperation with K-Trains, with Dominik Chaloupka.

Supplements remodeled on the repaintpacks can be used on the creation of own repaints and repaintpacks under the condition, that this original readme will be added to the published repaint, and will be reffered to in the readme created by you.

Even though these supplements are allowed to be used under certain conditions, *it is prohibited to use the textures from this repaint pack for the creation of another repaint.* For this, use your own creation. This concerns main textures as well as normal mapp textures.
