MÁV 193 214

Installation guide

This repaint needs the K-Trains Vectron and the official repaint pack in order to function correctly

- https://k-trains.com/en/produkt/vectron-class-193/
- https://k-trains.com/en/produkt/vectron-class-193-reskins/

Installation:

1. Move the included Assets folder to *Steam/steamapps/common/RailWorks*
2. In the RailWorks folder navigate to *Assets/Kal000px/193pack01* and delete the `Blueprints.pak` cache file
3. Inside this folder navigate to *RailVehicles/Electric/RJ 193 206* and copy `Vectron.GeoPcDx` and `Vectron_Accessories.GeoPcDx` files to *RailVehicles/Electric/MAV 193 214* folder

After this, the locomotive is ready for use. For easier use, some Quick Drive consists are included, which are available at https://www.trainsimulator.hu/szemelyvagonok/

Have fun!
