

Scenario 15: Picasso

Train: Autorail XBC X 3800

MaxSpeed: 115 km/h

Service: (Olivone-) Civitella Barrea-Riva San Ceresio

Information:

2009. Drive the famous Picasso of the french SNCF via Intragna-Miralago-Como to Riva San Ceresio. This special service was booked by a french group. The first part of this journey brought them from France via Roveredo to Olivone, where the group stayed overnight. Now, you drive the group to Riva San Ceresio, where they will stay the whole day. There's a lot of traffic today, and as you are „only“ a Railtour service, the other trains have priority in traffic. So keep your eyes on the signals...

Signalling problems:

Signal problems: Ovarese and Squinzano

Further informations:

- Please install all rolling stock from the „BasicRollingStock.pdf“ file. This rolling stock is used in this particular scenario and as well in future scenarios. Please note that you eventually need to download additional rolling stock for this scenario.
