

# Felberpass

Thank you for downloading the route Felberpass.

Felberpass is a fantasy route through the Austrian alps. It is 90km long and connects the cities of Bregau and Innbach. The player can choose to either drive over a mountain pass (about 60min) or a high speed rail link (about 30min). There are three places where the two routes intersect and are connected with each other. (There is a szenario which makes use of this. An IC train is diverted because of the danger of avalanches)

This route was purely a test project for me to get to know the routebuilder. Initialy I was not planning to release this route to the public, but after lots of good feedback I changed my mind.

## **Installation:**

Simply install the rwp file using the Railworks Package Manger.

**IMPORTANT! SADs freeware route Altenburg - Wildau must be installed!**

<http://rail-sim.de/railsimnew/index.php/en/downloads/view.download/41/827>

**For copyright some items could not be included in this download. However, you can download them all in one pack here:**

<http://www.rail-sim.de/railsimnew/SpezialDownloads/icepak.rar>

**To play any of the szenarios - including free roam szenarios - you will need to download some rolling stock (list included)**

**Thanks!**

The following people have build assets for this route:

SAD  
ice  
astauder  
Chrischan  
Engfer  
Ted  
Pawerybs  
Ralix  
news  
fight43dom\*

The following people where kind enough to become beta testers:

Pawerybs  
Badorn  
Manuel Sommer  
jot  
viox2k  
Wambo  
fight43dom\*  
DobrWtal85  
Maik  
d0nn

\* This user was kind enough to build the tunnels for the high speed line. However these assets were only built for this route and are not to be re-distributed or used in other routes.

Many thanks for all the support I got on the Railworks Forums.

Comments, questions:
