

Scenario 8: IC „Murge,, (Roveredo-) Intragna-Como S.G.

(8 JC) - IC "Murge" (Roveredo-) Intragna-Como S.G.

Train: E656

Max Speed: 120 km/h

Service: Intragna-Como S.G.-Squinzano

Information:

2006. Tonight you drive on a E656 the IC 'Murge' to Como S.G. You take over the train in Intragna, where a diesel engine (D 445) has brought our train from Roveredo. Unfortunately, you will be delayed already in Intragna (about 3 minutes). Your job is to reduce or at least not to increase the delay... In Como, you have to bring the engine to Squinzano to hand it over to a colleague...

Signalling problems:

The signal in Aquarica should be yellow, because the next one (Ovarese) is red. So please slow down after you passed Aquarica.

Further informations:

- Please install all rolling stock from the „BasicRollingStock.pdf“ file. This rolling stock is used in this particular scenario and as well in future scenarios. Please note that you eventually need to download additional rolling stock for this scenario.
