

Scenario 4: R (Lecco-) - Riva San Ceresio – Como S.G.

Engine: D445

Max Speed: 120 km/h

Service: (Lecco-) Riva San Ceresio – Como S.G.

Information:

2002. You're a engine driver employed by the italian FS and live in Riva San Ceresio. Like always, your shifts starts in Como S.G. To reach Como, you use the stopping service Lecco-Como. As usual, you get there as a passenger (take a seat in one of the coaches or in the cab with your driver colleague). Enjoy the little trip...

Signalling problems:

There are no signal issues. Oviato's platform doesn't show up on the HUD (F4). Platform in Como doesn't work.

Further informations:

- This scenario is the third part (2010) of a trilogy with the stopping service R25652. The other two parts (1990 und 2000) will be released as soon as enough rolling stock from the right era is available to download.
- Please install all rolling stock from the „BasicRollingStock.pdf“ file. This rolling stock is used in this particular scenario and as well in future scenarios. Please note that you eventually need to download additional rolling stock for this scenario.

-- See next page --

Following additional rolling stock is needed in order to play this scenario:

Payware:

D445 pack – Anemonelab - www.anemonelab.it

Freeware:

There's no more rolling stock needed for this scenario.

Scenario tested by Ch.Goddard. Thanks a million.
