Freight transfer from Germany

This download includes a scenario surrounding a freight train on the Three Country Corner Route. It has been raining for days and slowly but surely the railways are having trouble with all the water.

It is vital that the player is familiar with the Austrian signalling system. Because of the complex signalling it can happen that the speed limit shown in the HUD is incorrect. Please ignore the HUD and always refer to the signals.

Time: 40min

Difficulty: Difficult (Make sure you are familiar with the Austrian signalling system)

Required are 2 payware products and 3 freeware downloads.

I hope you will enjoy this scenario.

Version 1.1

Required rolling stock

Payware:

HRQ Taurus: (Make sure you have the latest version installed!)

http://railworks-austria.at/index.php/downloads/viewdownload/13-personenwagen/161-oebb-cityshuttle-wagen

Installation

1. Unzip the file to a place where you can find it easily (Best to use the desktop)

2. Go to your Train Simulator root folder (normally …/steam/steamapps/common/railworks) and open the "*utilities*" application

3. Click on "*package manager*", then click on "*Install*" and search for the "*.rwp*" file.

4. **IMPORTANT!** Once installed, open Train Simulator and clear the cache!

5. **Enjoy!**
