

## Scenario 3: R12640 Breganzona C.le – Como S.G.

Payware Version

Train: EMU Ale 501/502 Minuetto

MaxSpeed: 160 km/h

MaxSpeed  
on the route: 120 km/h

Service: Breganzona C.le – Como S.G.

### **Information:**

Tonight, you'll be driving a stopping service from Breganzona Centrale to Como S.G. It's raining, but that shouldn't be a problem as the Minuetto has fabulous acceleration. So you should be able to be on time. You have to make a U-turn in Manduria. And make sure to arrive on time in Como S.G as some of your passengers have to catch the last train leaving Como direction Lecco. So keep up with the timetable...

Information on the Minuetto:

To keep up with the timetable, you have to know exactly how to handle and drive the engine. There will be no time while driving the scenario to check out how the engine works.

The following payware addons are necessary to run this scenario:

### **Anemonelab:**
