

Alternative scenario pack for the JustTrains Three Country Corner Route

This pack includes copies of the 10 standard scenarios included in the JustTrains Three Country Corner route. Whilst the scenarios themselves are the same, they have been fitted with alternative and more realistic rolling stock. Because some locomotives behave differently or have different systems, some scenarios had to be slightly altered.

The scenarios will not overwrite the original ones but will appear in your scenario list marked with an “A” for “Alternative”

Required for this pack to work is the JustTrains Three Country Corner Route, 2 payware add-ons and 10 freeware add-ons.

A full list with download links is below.

I hope you will enjoy these scenarios.

Required rolling stock

Payware:

HRQ Taurus: (Sicherstellen ,dass die neuste Version installiert ist!)

Installation

1. Unzip the file to a place where you can find it easily (Best to use the desktop)
2. Go to your Train Simulator root folder (normally .../steam/steamapps/common/railworks) and open the “*utilities*” application
3. Click on “*package manager*”, then click on “*Install*” and search for the “*A Scenarios.rwp*” file.
4. **IMPORTANT!** Once installed open Train Simulator and clear the cache!
5. **Enjoy!**

Many thanks to Stefan from the SignalTeam for all his help and support.
