System requirements:

- [RW/0381 – n-Wagen „Karlsruher Steuerwagen“ \(silber\)](#)
- [RW/0381 – n-Wagen „Karlsruher Steuerwagen“ \(türkis\)](#)
- [RW/0381 – n-Wagen „Karlsruher Steuerwagen“ \(verkehrsrot\)](#)
- [Koeblitzer Mountain Route V3](#)

Information:

This freeware-pack contains 16 drivable Karlsruher Steuerwagen by RW0381. Four verkehrsrote Wagons, three türkisfarbene Wagons and one silberfarbener Wagon. Each of these 8 wagons is available as an electric version and a diesel version. All 12 wagons from the original wagon pack are available without a cab-extension but in EFR-design. The textures on the outside have slightly been edited and changed. The new .bin files access solely the drivable Karlsruher Steuerwagen from the „Koeblitzer Mountain Route V3“. Consequently, the „Koeblitzer Mountain Route V3“ is a compelling requirement for the functionality of this package.

Installation:

1. Open the attached Installer „Install-RPP-EFR-RW0381-Karlsruher-Steuerwagen-fahrbar-V1“ with a double-click.
2. Attend the orders in the Installer und read everything thoroughly.
3. Wait until the Installer has finished the installation of the package.
4. Go to [RAILWORKS]\Assets\DR and run „KarlsruherKopf-EFR-GeoMover.cmd“
5. Done, your wagons are now ready to drive.

Selection in Scenario-Editor:

To be able to use the wagons in the Scenario-Editor, you need to activate the following providers.

Special thanks:

Many thanks to Siegfried Derks – SAD, who gave me the permission to use the cab of a Karlsruher Steuerwagen included in his route to make the Karlsruher Steuerwagen by RW0381 drivable. Thanks to FabiaLP from the SteuerwagenSchmiede, too, for helping me creating the diesel versions of the wagons and some other modifications. Thanks to everyone who helped creating this package and probably I'm gonna make more AI-RailVehicles drivable in the future.

Enjoy!
