

## Extra key mappings and cab switch sounds for RailTraction BR218

### Installation

Take a backup copy of the following files:

```
fopixtrains\treinen\br218\sound\TB11inextra.proxybin  
fopixtrains\treinen\br218\sound\TB11inextra.proxyxml  
fopixtrains\treinen\mapper\maptrein_br218.bin
```

Unzip the fopix\_BR218\_keys.zip file and overwrite the old copy of the three files listed above.

### Sounds

The switch on/off sounds use the wiper on/off switch sounds from the Kujū BR294. All the operable BR218 switches should now click when moved.

### Key Mappings

The following key mappings have been added to the modified key mapping file:

<http://rail-sim.de/forum/wsif/index.php/Entry/1864-Modifizierte-vR-%C3%A4hnliche-Tastenbelegung-f%C3%BCr-die-BR-218-4-aus-dem-Railtraction-Ad/>
