

# RPP – [DTG] BR474.3 UpdatePack – V1

## Content:

- Updated textures
- Destination board update with 69 new textures
- A new assignment of keys (similar to vR)
- Advanced driving qualities
- QuickDrive Consist for Kurz-, Voll- and Langzug
  - Consists variants: pantograph and third rail

## System requirements:

- [DB BR 474.3 EMU Add-On](#)

## Information:

This freeware-pack contains the DB Class 474 made by DTG in an extended version with a destination board update, updated textures, advanced driving qualities, a new assignment of keys and much more. The password to access this package is 6434111. Textures have been edited and changed. The new .bin files access solely the DB Class 474 made by DTG. Consequently, the DB Class 474 is a compelling requirement for the functionality of this package.

## Installation:

1. Go to „[RW]\Assets\DTG\BR474Pack01“ and unzip the „BR474Pack01Assets.ap“ with an archiving program like WinRAR or 7-Zip. Now there have to be, including the .ap file, 11 or 12 (with Blueprint.pak) files in the directory „[RW]\Assets\DTG\BR474Pack01“.
2. Open the attached Installer „Install-RPP-DTG-BR474-UpdatePack-V1.exe“ with a double-click
3. Attend the orders in the Installer and read everything thoroughly.
4. Wait until the Installer has finished the installation of the package.
5. Go to „[RW]\Assets\DTG“ and run „DBBR474-UpdatePack-GeoMover.cmd“.
6. Done, your wagons are now ready to drive.

### **Selection in Scenario-Editor:**

To be able to use the wagons in the Scenario-Editor, you need to activate the following provider.

- DTG\BR474Pack01

The new wagons have the prefix „RPP“ in the editor. HL is for the mainlines and NL for the sidelines. More in the „Ziele und Linien“ list.

### **Copyright:**

- improved textures, Keybindings, Destination, QD Consist ©Supergamer11267
- fixed Kombi lever and brakes ©AMG
- Model, etc. (see Originalconsist ReadMe) ©RSC/DTG

### **Special thanks:**

Many thanks to AMG from the Rail-Sim Forum, who gave me the permission to include his fix for the kombi lever and the brakes into this package. Many thanks to you. Thanks to everyone who helped creating this package and probably I'm gonna make more AI-RailVehicles drivable in the future.

Enjoy!
