

# **RPP – [DTG] HH-HL Dosto UpdatePack – V1**

## **Content:**

- Destination board update with 60 new textures
- A new assignment of keys (similar to vR)
- Improved sensitivity of the levers in the cab
- Fixed brakes
- Fixed wipers
- Light update for better performance

## **System requirements:**

- [Hamburg-Lübeck Railway Route Add-On](#)

## **Information:**

This freeware-pack contains the Doppelstockwagen from the Hamburg-Lubeck Route made by DTG in an extended version with a destination board update, fixed brakes, fixed wipers, a new assignment of keys and a light update for better performance. The password to access this package is 1111236. Textures have been edited and changed. The new .bin files access solely the Hamburg-Lubeck Route made by DTG. Consequently, the Route is a compelling requirement for the functionality of this package.

## **Installation:**

1. Open the attached Installer „Install-RPP-DTG-HH-HL-Doppelstockwagen-UpdatePack-V1.exe“ with a double-click
2. Attend the orders in the Installer and read everything thoroughly.
3. Wait until the Installer has finished the installation of the package.
4. Go to „[RW]\Assets\DTG“ and run „DBDABpbzkfa-UpdatePack-GeoMover.cmd“.
5. Done, your wagons are now ready to drive.

### **Selection in Scenario-Editor:**

To be able to use the wagons in the Scenario-Editor, you need to activate the following provider.

- DTG\HamburgLubeck

The new wagons have the prefix „RPP“ in the editor. You can find the possible destinations in the „Ziele und Linien“ list.

### **Special thanks:**

Thanks to everyone who helped creating this package and probably I'm gonna create more UpdatePacks in the future.

Enjoy!
