

**Assets by michael249 – v1**

Thank you for downloading my Asset Package for the Train Simulator 2016. In this package you will find the following assets available for use:

- A church
- 5 houses in various colours
- An ÖBB Waiting room
- 2 sets of office rows
- 4 different Austrian old town apartments
- An alpine hut

### Installation

Unpack the .rwp and install them via the Railworks Package Manager. If you are a route builder and would like to use the assets in game, please check the folder "Austria". The Assets will show up in the route editor with the prefix "SD".

## **License**

You are allowed to use these assets in any freeware route, however you may not package these assets without my permission, rather only provide a link to download in your read me. If you would like to use these assets in a payware route, please contact me for permission.

## **Donation**

If you would like to donate to support me, you can do so at the following link:
