

[RailTraction] BR648 - InputMapper Update

Content:

- Advanced InputMapper with new features

System Requirements:

- [RailTraction BR 648](#)

Informationen:

The new .bin files access solely the RailTraction BR648. Consequently, the BR648 is a compelling requirement for the functionality of this package.

Installation:

1. Copy the attached „Assets“-folder into your Railworks-Maindirectoy and confirm the overwriting of files!
2. Done, the new InputMapper is now installed. You can find the new assignment of keys in the „InputMapper_EN.pdf“.
