RPP – [RailTraction] BR648 – WFB – V1

Content:

- BR628.2 old WestFrankenBahn design
- BR628.2 new WestFrankenBahn design
- QuickDrive Consists for single, double and triple units

System Requirements:

- RailTraction BR 628.2

Information:

This repaint-pack contains two WestFrankenBahn repaints (old and new) for the BR628.2 made by RailTraction and QuickDrive consists for single, double and triple units. Textures have been edited or changed. The new .bin files access solely the RailTraction BR628.2. Consequently, the BR628.2 is a compelling requirement for the functionality of this package.

Installation:

1. Copy the attached „Assets"-folder into your Railworks-Maindirectoy and confirm the overwriting of files, if you are asked for.
2. Go to „[RW]\Assets\RailTraction" and run „BR628-2-WFB-RepaintPack-GeoMover.cmd".
3. Done, your diesel multiple unit is now ready to drive.

Selection in Scenario-Editor:

To be able to use the DMU in the Scenario-Editor, you need to activate the following provider.

- RailTraction\BR628

The new DMU bears the label „WestFrankenBahn" resp. „WFB" in the editor.

Special Thanks:

Thanks to everyone who helped creating this package and probably I'm gonna create more repaints for railvehicles made by RailTraction.

Enjoy

Jannik Scharff a.k.a Supergamer11267
