

Introduction

I love driving in mountain routes like the beautiful Three Country Corner Route. I wanted to discover other mountain region and so I bought one, then two and finally three Austrian roads from RSSLO. The roads are very pleasant for driving but the textures are shocking! It looks like RSSLO did not have any calibrated screens...

Two points problematic :

- Vegetation and terrain colors : this is what this patch fix.
- Incoherent distribution of vegetation : I can't correct that.

It's not possible to correct all textures from a route. This patch only affects the most frequent textures or less common very flash texture. The goal is to have a harmonious global rendering on the three routes. The last negative is the file structure of RSSLO: some files are common to the three routes and all roads do not have exactly the same color palette. Südbahn & Tauernbahn are about the same but Mittenwaldbahn is more vivid. The patch is a compromise...

Note

This patch fixes centralizes and two other patches will not be updated; too complicated to separately manage patches with commonalities.

Update

Version 1 : fix all 3 RSSLO mountain routes.

Backup

It is now too annoying to save file by file, copy the entire folder RSSLO_Routes another location to have a backup !

Install

Extract the downloaded 7z file. Copy the Assets folder from the extacted files to your Raiworks folder. Windows will ask to overwrite 34 files, accept!

Pateched files

This table show how files are used by the routes. Common textures affect the three routes. Südbahn use mostly common files.

Texture	Mitten waldba hn	Südbah n	Tauern bahn	Comm on
Assets\RSSLO_Routes\RSSLO\scenery\Vegetation\Textures\Bush_Groupe_1.TgPcDx				x
Assets\RSSLO_Routes\RSSLO\scenery\Vegetation\Textures\Bush1.TgPcDx				x
Assets\RSSLO_Routes\RSSLO\scenery\Vegetation\Textures\Bush2.TgPcDx				x

Uninstall

Restore your backup folder.

Advise

Replace the RSSLO track by DB track for Südbahn & Tauernbahn : RSSLO Südbahn - Community Update

Replace the RSSLO track by DB track for Mittenwaldbahn (german part) : Markus Schöbel fix

Issue

Should be any ! It's the original RSSLO texture with some color adjustment and I check the result for the three routes.
