

TRAIN SIMULATOR 2014 SCENARIOS

REGIONALEXPRESS from Siegen to Hagen (Winter 2010)

We do not put such a large value on full realism. This means that our scenarios will not again reflect the straight material happening on the rail. So not meticulously ensured that certain wagons or locomotives appear only in the relevant period. In our scenarios the wagons of the epoch VI will pull for example locomotive of the epoch V or reverse. Also with the preference of certain train types or train kinds is not always traded near to reality. In our scenarios there is furthermore the Interregio which the road provides no more in the reality.

So you can also reach the objectives or events do the following: quickly work off your schedule and adhere to the speed limits.

With our scenarios we do not attach so great importance to the passenger comfort. Is called. 100% satisfaction are not thereafter taken into account and thus developed our scenarios with us.

Red stop signals (Hp0) can appear in the scenario and you are informed in the approach of the journey. The train dispatcher will release as fast as possible the distance again. It can happen that must be waited at certain places a little longer (five minutes was our record)! Thus please some patience!

Unintentional hold are not included in the plan in our scenarios – therefore a TAB. – inquiry is superfluously. Should it still, however, happen (with TS2014 one must do to himself on everything calmly) please an info to the
