Summary: What if the Minuetti consists were used on this route ? In this scenario, you will be able to test it !
Date: June 14, 2004
Duration: 50 minutes

Installation

These scenarios are packaged in the same ".rwp" file. Install it through Train Simulator 2013 package manager that you will find in your railworks folder (Utilities.exe).

Installation of Brescia-Iseo's tracks

To be able to play this scenario pack, you have to replace the original tracks.bin file with the one that is included in this package. This new file removes the English tracks and track rules with the Italian ones from the route Brescia-Iseo. It removes also some traffic limitations in station Mortara. If you don't execute the following steps, you will get errors when trying to load the scenarios.

1. Adding the provider to the route

1) Be sure that the route Brescia-Iseo is installed on your system. If you don't have it, you can download it from http://www.amicitreni.org/download/comment.php?dlid=806

2) Open Train Simulator and navigate to the editor (1).

3) Select the route "Milano – Mortara" in the list and click "Edit"

4) When the editor is open, select the blue cube in the middle window on the left (2).

5) In the appearing window on the right, select "Pedro" as provider (3) and then tick "Brescia-Iseo" as product (4).

6) Save the changes (F2) and exit the editor by pressing on the "Play" button (5).

2. Replacing the tracks.bin file

1) Go to the following directory: \Steam\SteamApps\common\railworks\Content\Routes\2a13e13c-a6e7-4382-8f0d-d0c93117ea2c\Networks

2) Make a copy of the original tracks.bin file.

3) Replace it with the version included in this package.

4) Start Train Simulator and clear the cache (Options -> Tools -> Clear cache).

Thanks

I'd like to thank all route and rolling stock/reskin creators.

Thanks to Ralf Kroneberg for the german translation of all scenarios.

To report any problem or feedback, please send an email to railworks@beluxtrains.net.

Have fun !

Christophe Durvaux (May 2013)
