BYA Wagon
EWS Reskin Pack

Contents

How to Install

Extract the archive to a destination of your choice and install the .rwp file by using the Utilities.exe which can be found in the main folder of Train Simulator.

When you've opened the Utilities.exe, click 'Package Manager' and then 'Refresh'. Once the process is complete, click 'Install'. Select the .rwp file and click 'Open'.

Next, open your TS main folder (if you haven't already) and go into the 'Assets' folder.

Scroll down and you will find a batch file called 'Install_blk11_BYA_EWS_ReskinPack.bat'.

This script will copy the .GeoPcDx files into the reskin folders automatically.

After running this installation script, installation should be completed successfully. It is not necessary to clear the cache from within Train Simulator before using the reskins.

Required Add-Ons

[Steam]
- ➢ South Wales Coastal: Bristol - Swansea Route Add-On

In the Scenario Editor

Although the wagons are included in the Bristol - Swansea route add-on, you'll have to activate a different Provider/Product in order to use the reskins.

The following Provider/Product must be activated:

DTG
Class67Pack03

After that, you can place any of the reskins as usual.

Included Liveries

Below, you can find an overview of every livery included in this reskin pack with images and names.
