- Diverted -

1L48 09:43 Swansea - London Paddington

Scenario for South Wales Coastal: Bristol - Swansea

How to Install

Extract the archive to a destination of your choice and install the .rwp file by using the Utilities.exe which can be found in the main folder of Train Simulator.

When you've opened the Utilities.exe, click 'Package Manager' and then 'Refresh'. Once the process is complete, click 'Install'. Select the .rwp file and click 'Open'.

The scenario will now be installed automatically. After that, you can start Train Simulator and play the scenario.

Please note: Due to a fault with the route, Train Simulator may crash part way through this scenario. I strongly recommend that you change the 'Scenery Detail' setting in the graphical options to one notch lower than maximum and clear the cache before playing this scenario. Additionally, I recommend that you save your progress regularly.

Description

From 12 September to 21 October, the route between Patchway and Severn Tunnel Junction has been closed so that Network Rail can prepare the Severn and Patchway tunnels for electrification.

Many Great Western Railway services that would normally run through the Severn Tunnel now terminate at Bristol Parkway and busses replace these trains between there and Newport. High Speed Train services to South Wales and selected stopping services from/to destinations south of Bristol are being diverted via 'the great way round' - the route via Gloucester.

Today, you are in charge of the 09:43 Swansea to London Paddington service, driving it as far as Newport where another driver will take over.

Year: 2016

Duration: 1 hour 15 minutes
Difficulty: Easy
Traction: GWR (FGW-livered) 43093 & 43088

Track covered: Swansea → Newport (South Wales)

This scenario is based on the real timetables (autumn 2016), including all the changes made to services during the Severn Tunnel closure.

Required Add-Ons and Reskins

Payware

Steam:
- ➢ South Wales Coastal: Bristol - Swansea
- ➢ European Loco & Asset Pack
- ➢ Arriva Trains Wales DMU Pack
- ➢ Class 150/2 DMU Add-On
- ➢ Class 170 'Turbostar' DMU Add-On
