

## RSSLO SemmeringBahn and TauernBahn patch (v 1.1)

After fixing Koblenz-Trier and all the DTG/RSC, I decide to fix my two RSSLO routes. The patch focuses on SemmeringBahn and TauernBahn. Due to the way RSSLO build routes, IT WILL IMPACT other RSSLO routes. I don't have all of them so I don't know how. It should affect vegetation, skies and tracks.

### What does the patch?

- Changes the TimeOfDay to have the nicer Kuju clouds
- Changes the tracks to DB tracks
- Changes color saturation for some plants and uses my Koblenz-Trier improved grass.
- Changes some terrains and some procedural textures
- Works for the following routes:
  - RSSLO SemmeringBahn
  - RSSLO TauernBahn

### Installation

- First, make a backup of the Assets\RSSLO\_Routes folder
- Unpack the 7z files
- Use utilities to install the rwp or unpack the rwp and past it in your game folder
- Overwrite older files

### Uninstallation

Restore a backup of the routes Assets and Content

### Bugs

In some locations, grass goes a bit over the track
