

Hamburg-Hannover Deluxe

Vorwort:

Thank you for downloading the update of the route Hamburg-Hannover. This Update will bring optical and technical changes to the route.

Special Thanks to following people who habe helped to make this update:

Solin Hektos, Signalisierung, PZB, Geschwindigkeiten, Vegetation
Markus Schöbel Überarbeitung Signalisierung, Vegetation
CMD.Cornflakes Signale, Große Hilfe für kleinere Dinge
Ice Mitgabe einiger Objekte
TSC Mitgabe PZB-Magnete
Bahnfreak Vegetationsarbeiten

The route is changed in those aspects:

- Hectometer signs on the whole route
- Signals and PZB changed
- DB Tracks implemented
- Route speeds changed
- Adjusting terrain
- Some stations look more realistic
- Huge replacement of the vegetation with new trees and textures
- New look of some iconic places

Why Hamburg-Hannover Deluxe ?

Since Release of the first upgrade 2 years ago new things for TS was released. So I wanted to bring Hamburg-Hannover to the actually possible state of the art, with new objects and signals for example. So I asked the user Solin, if I could use his work for doing a further update of the route.

This route should play in the year 2012 where the route was not changed in the way as it is today, at all between Ashausen and Lueneburg there was no third track. So you can play with many trains at older times and you can see many different signals.

The route „Hamburg-Hannover Deluxe“ comes to your computer as a clone of the original route. You can find the new folder „00000037-0000-0000-0000-000000002018“ after the installation on your computer. The original route is „00000037-0000-0000-0000-000000002013“. So that’s an info for you. Scenarios of the old original route DON’T work on this route update anymore.

Installation

Now you should have downloaded all necessary things. Download now the route update itself:

>>Download Hamburg-Hannover Deluxe<<

Install now 1) Streckenupdate Grundlage. New DBTracks-Repaints are placed here. You don't have to install further things.

But if you want the high detailed vR HQ Tracks, you can install those with 2). There are normal and dark gravel textures. To use those vR tracks you need the PAYWARE route Freiburg-Basel!

Update for 64 Bit

With release of TS 19 in the 64 Bit version it was necessary to update the route so the route is playable again. So you need following new things:

[>>>Download VP Grass Pack<<](#)

[>>>Download Vegetation Schienenbus<<](#)

[>>>Download Altenburg-Wildau<<](#)

[>>>Download Baufahrzeuge<<](#)

[>>>Download Landwirtschaftsmaschinen<<](#)

[>>>Download Baumstämme<<](#) + [>>>Download Chats<<](#)

[>>>Download Afrika Personen<<](#) + [>>>Download Beach Personen<<](#)

Installieren Sie bitte (wenn noch nicht geschehen) auch noch einmal den Download von der kompletten Vegetation, der jetzt weitere benötigte Vegetation enthält.

If you installed all correctly, the route should be available in your TS as Hamburg-Hannover Deluxe – but only in free roam or you must download any scenario for this route.

With this update all planned work is done for this route finally. A big thank you to all creators of those objects which makes every route better.

Have fun with this update.

If you enjoy this route update, we would be grateful for every small donation if you like. Thanks.

Manual updated : Juni 2019
