

RWA 1044 Scenarios

In this package you will find two scenarios for the Railworks Austria BR 1044

Szenario1: “RWA 1044 - Freight from Bludenz to Wolfurt”

Your job today is to take a freight train from Bludenz to Wolfurt. This train was supposed to be pulled by two locos but one of them broke down. So you are stuck with only one. Try to avoid wheelslips and drive gently.

Length: 50min

Difficulty: difficult

Szenario2:”RWA 1044 – Euronight Lindau – Bludenz”

It is a bitter cold winter night and the Euronight from Munich has arrived at Lindau. Take the train to Bludenz where your shift ends and another driver will take over.

Length: 45min

Difficulty: easy

version 1.0

Required rolling stock

Installation

1. Unzip the file to a place where you can find it easily (Best to use the desktop)
2. Go to your Train Simulator root folder (normally .../steam/steamapps/common/railworks) and open the “*utilities*” application
3. Click on “*package manager*”, then click on “*Install*” and search for the “.rwp” file.
4. **IMPORTANT!** Once installed, open Train Simulator and clear the cache!
5. Enjoy!
