For this Pack to work you will need to own the Train Simulator base and this DLC

[Southeastern Class 465 EMU Add-On](#)

You will also need the AP Class 465 Pack for this to work

[Class 365/465/466 \(Met-Cam\) Sound Pack](#)

PLEASE NOTE THESE THINGS:

- This soundmod will **override** the AP Class 465 Soundpack.
- This will also make the class 365 **not** have any motor sounds (I make an additional soundmod for the 365 in the future). You will need to reinstall the London - Peterborough route to have the default sounds on the 365 again.
- Like most of my soundmods. This is a soundmod for driving inside the cab. I have added outside sounds but the focus was in the cab.
- The Class 465 included in the Chatham Main Line will not be affected by this soundmod.

Recordings have mostly been taken from the YouTube channel [emmo999](#) in particular [this video](#).

Installation

Please install the 465 DLC via Steam first then the AP Soundpack after which you can install this soundmod.

To install this soundmod:

In the downloaded file, you will find the *.rwp file which needs to be installed with Utilities.exe found in the Train Simulator main directory (steam/steamapps/common/railworks).

3

Known Bugs and errors

Passenger has lost some sounds

Compatibility with Repaints

Repaints

This Pack is compatible with all Repaints

For Developers

Scenario creators

Turning on another folder in addition to the standard folder is not necessary.
