BR 407 ICE 3 Velaro D Soundmod Manual

Contents

For this Pack to work you will need to own the Train Simulator base game and this DLC

[DB BR 407 'New ICE 3' EMU](#)

This Soundpack offers a completely new and changed soundsetting inside Train Simulator.

Recordings have mostly been taken from the YouTube Channel [SepianSound](). Additional Recordings are from an ICE 2 between Frankfurt and Fulda. More sounds were sent to me by the users 'Teslawelle' and 'MeloRW'.

Installation

In the downloaded file, you will find the *.rwp file which needs to be installed with Utilities.exe found in the Train Simulator main directory (steam/steamapps/common/railworks).

Known Bugs and errors

The focus of this soundmod was the cab. Exterior sounds were added without checking them much.

Compatibility with Repaints

Repaints

This Pack is compatible with all Repaints

For Developers

Scenario creators

Turning on another folder in addition to the standard folder is not necessary.
