Installation

These scenarios are packaged in the same ".rwp" file. Install it through the Train Simulator 2020 package manager. These scenarios were created on the version 3 of the route. They may not work with previous route versions.

Important notes

1) TTB BR294 upgrade pack

If you are using the TTB BR294 pack, you will not be able to start the engine of the BR294 repaints available on rail-sim.de if you don't upgrade their .bin file with the ones available from dw-agency's website (http://www.dw-agency.de/downloads/sound_ttb/freeware/).

2) vR BR143 EL Destinations boards

To have the BR 143 correctly showing the destination boards in these scenarios, you have to set the ZZA Manager as follows:

- Position 8: 16 - Altenburg

- Position 9: 16 - Köblitz
- Position 10: 16 - Bad Rinckenburg
- Position 11: 16 - Wildau
- Position 12: 16 - Trier Hbf

You can find this file here:
