

ICE 3M Soundupdate

for Train Simulator 2020 (and up)

You will need the following DLC for this Soundupdate to work

[The Rhine Railway: Mannheim - Karlsruhe Route Add-On](#)

What this soundpack offers

This soundpack changes the entire sound of the ICE 3M included in the above route. No sound remains default. Inside and outside. This soundpack is based on recordings from an ICE train between Dortmund and Cologne

The main preview video is [here](#), while a second preview can be found [here](#).

Installation

1. Install the 'RhineRailway' route DLC via Steam
2. In the downloaded file, you will find a *.rwp file which needs to be installed with Utilities.exe found in the Train Simulator main directory (steam/steamapps/common/railworks).

Please Note

- Please remember to turn ON 'EFX' in the Train Simulator options under the section for 'Audio'.
- This soundupdate is NOT compatible with the standalone DLC. The unfinished BETA version however is. I have uploaded that to [here](#). You can download it from there if you want.
