Virtual Railroads

BR 189 Soundmod

for Train Simulator 2020 and up

Please turn ON 'EFX' in the Train Simulator Option under 'Audio'

Otherwise this soundmod won't have the intended effect and will sound unrealistic

This Mod changes the entire sound within Train Simulator. Everything has been redone and modified

PLEASE NOTE: Frequent changing from outside to inside view in a short time period is not recommended. The sounds are otherwise going to overlap too much. There is no workaround for this.

A preview video is [here](#)

You will need the following for this to work

[DB BR189 VRot ExpertLine](#) OR/AND [DB BR189 C-AKv ExpertLine](#)

Sound Recordings used were fully sent to me by Niclas (aka [Br_185_Drehstromer](#))

Installation

1. Install the BR 189 DLC by VirtualRailroads
2. Go to your Train Simulator main folder (usually C:\Program Files (x86)\Steam\steamapps\common\RailWorks). There is an executable program called Utilities.exe. Under the section *Package Manager* you can install the *.rwp file included in the download.

If there is a problem with installing, you can try installing it manually:

1. Open the *.rwp with WinRAR or 7Zip. You'll find a folder called 'Assets'.
2. Copy this folder into your Train Simulator main directory and **overwrite** everything when asked
