

# ICE EXHIBIT

Please clear game cache before playing this scenario!

**This is a game of concentration and resisting temptation**

You will need to press the 'Tab' key with some signals and drive on the wrong track.

You have another ICE train on your tail, so no slowing down to admire the views!

There is no point scoring nor is there any passengers to pick up. It is fictitious and is meant to test your driving skill and have fun.

Are you easily distracted? Are you a hot racer or ICE cool driver?

I do want to make this a three-part scenario and hopefully get time to do parts 2 & 3.

## ICE EXHIBIT 1/3

People are still reluctant to use public transport, so Karlsruhe Transport officials have decided to hold a Transport Day at VKB. You will drive the M3 ICE as one of the exhibits to Karlsruhe VKB, picking up school children and their guardians along the way. ICE has permission to run on light rail. The ground will be monitored for vibration and vibration reduction work was carried out on track along your route.

Starting at 07.59 from Mannheim the ICE will go to Spoeck Richard Schule in this first part of three scenarios.
