

Thank you for downloading my scenario! You'll drive a class 648 on the „Odsherreds Line“ from Holbaek to Nykøbing. I also took few KI-trains in my scenario. The timetables of the player's train and the KI-traffic are the original timetables of the DSB in 2020. Of course you'll need some things for playing:

Now you have to install this route:

Put the Content-folder in your Railworks-register

Now I hope you have fun with this. If you see that there are mistakes or the KI-traffic is driving wrong, please contact me in the Rail-Sim-Forum. Waiting for a KI-train more than three minutes is not a mistake.
