

Drive train 45321 (you may use any number you like) from Hall in Tirol to Brenner, I have calculated around 10mins to set up your 2 BR186's so you can leave when the signal clears (around 15:14). There is really no need to rush. Passengertraffic based on real timetables, cargotraffic is low due to works on the Brennerbahn and most traffic rerouted.

Train data:

Trainnumber: 45321 (or your choice)

Train length: 265m

Weight: 1358 tons
