

## [Seungwan] NZ 1948 Saturn (2004)

Drive the Nachtzug 1948 “Saturn” from Ostseebad Binz as far as Stralsund Hbf. Your traction for this journey is a DB Baureihe 145 traffic red livery. Your coaching stock consists of 9 coaches with City Night Line Livery.

### Important notes for this scenario:

1. This scenario is semi fictional because unfortunately I don't have timetable from year 2004 so I'm using the 2021 timetable (freight timetable is fictional) with a bit of alterations. For the traffic, I try to make it as realistic as possible for the year.
2. The NZ 1948 is using the real timetable I got from vagonweb
3. NZ 1948 train composition is from vagonweb.
4. **I planned to include on board announcement since I've recorded my voice as the announcer but I don't know why in game, the announcement is way too quiet. If anyone has a solution for this, then I'll happily tweak the scenario and add the announcements. But, for the time being, there will be no on board announcements**

Positive feedbacks and constructive criticism are welcome if you have any.

### Payware Requirements

1. [Inselbahn Route from DTG](#)
2. European Loco Assets
3. [Nachtzug Bundle from 3DZUG](#)
4. [Virtual Railroads DB BR 145](#)
