ICE 529 Bochum Hbf - Duisburg Hbf

Stop	Arrival	Departure	Platform
From Dortmund Hbf			
Bochum Hbf	07:36	07:37	4
Essen Hbf	07:48	07:52	1
Duisburg Hbf	08:05	-	3
To München Hbf			

Good morning,

today, you are driving an ICE 3 (BR 403) as ICE 529 coming from Dortmund Hbf on the section from Bochum Hbf to Duisburg Hbf. There, a colleague will take over in the direction of Munich Hbf. Your departure is at 07:37. Have fun!

You don't have to use the maximum speed on the section between Bochum and Essen, there are a lot of reserves in the timetable. Also, you still have the RE 11 in front of you, which will slow you down a bit if you are traveling too fast.

The AI passenger traffic is based on a timetable from June 25, 2021, but unfortunately cannot be implemented completely realistically due to limitations imposed by the Scenario Designer.

If you don't own one of the optional add-ons, you will have to change or remove the corresponding AI trains yourself in the scenario editor.

Mandatory Add-Ons

- Hauptstrecke Rhein-Ruhr (Scenario Route)
- Hauptstrecke München - Augsburg (Player Train)

Optional Add-Ons (AI Trains)

- Schnellfahrstrecke Köln
- Main-Spessart Bahn
- Rhein-Ruhr Osten

Freeware

- [HRR Scenario Designer Path Extension v1.0](#)
- [MSB Scenario Designer Formations Expanded](#)
- [BR 422 (HRR) Formation Fix](#)
- [Optional] [Talent 2 Abellio Livery (Alexander L.)](#)
- [Optional] [BR 422 VRR Repaint (Nickhawk)](#)
  - HRR version

Installation

Add the .sav file to this folder:

Documents/My Games/TrainSimWorld2/Saved/SaveGames

You can then find the scenario in the game under: Hauptstrecke Rhein-Ruhr -> Tools -> Scenario Designer -> ICE 529 Bochum - Duisburg

Deinstallation

Delete the .sav file.
