

[Seungwan] D 1205 “Italia Express” Koln – Roma Termini (1996)

Service Introduction:

D 1205 is an express train (schnellzug) service from Koln to Roma Termini in Italy. This train departs Koln at 19.30 and will arrive in Roma Termini at 11.40 the next afternoon. The journey will take approximately 16 hours and 7 minutes. This evening, you'll drive this service only as far as Koblenz, where another driver will take over the journey to Swiss and Italy.

Important notes for this scenario:

1. This scenario is using 1996 timetable I got from fernbahn.de website. All long distance services and IR service are using real timetables except for the Regional, Sbahn, and Freight services.
2. I include train service names in the scenario so you will know which train is which.
3. Train formations are from vagonweb and fernbahn.de and I will try to make it as accurate as possible.
4. Maximum speed of this service is 140 km/h.
5. The timetable at Bonn station is a bit tight so you have just to drive at your best ability. Good luck, it's still achievable.

Scenario Requirements

Below are the lists of Payware and Freeware requirements for the scenario to work at its full potential. Each requirements have their link to make it easier for you to navigate and search for them. Remember, If you're swapping locos or consists, I'm not responsible for any error occurred in the scenario.
