

# AI traffic preload set for REAL DRIVE advanced scenarios

Installation of these qd preloads are required for REAL DRIVE advanced scenarios to function.

Install the rwp file via the utilities app.

Say yes to the “these assets are already installed” if prompted.

-----

Always install the latest preload set when installing a new REAL DRIVE advanced scenario. Otherwise they may not function properly.

Thanks to Train Team Berlin for the blindzug, and for allowing it to distributed freely.

Thanks to Andreas Ladefoged (Forcesius) for his invisible slow engine.

Have fun real-driving.  
Kim Olesen.
