

# REAL DRIVE advanced. 4 drives for the Zürich Olten route

Payware:

Zürich Olten route

<https://www.trainworx.nl/product/zuerich-olten-route/>

Gotthardbahn route (available from Rivet Games and Steam)

3dzug Güterwagen Verkehrspack [https://www.3dzug.de/product\\_info.php?language=de&info=p276\\_verkehrspack-gueterwagen.html](https://www.3dzug.de/product_info.php?language=de&info=p276_verkehrspack-gueterwagen.html)

European Loco And Asset Pack

1: Open Package Manager and install the REAL DRIVE RWP-File

2: Install the latest preload package (IMPORTANT):

<https://rail-sim.de/forum/filebase/entry/7314-real-drive-advanced-ai-traffic-preloads/>

3: Open Train Simulator 2021 and clear cache.

## **IMPORTANT INFO BEFORE PLAYING:**

How to drive a REAL DRIVE advanced scenario: Go into the quick drive menu of the route. Choose the REAL DRIVE scenario. Choose what train, season, weather and time of day you wish to drive. Then choose the last destination (This is important). The other destinations in the list are the recommended stops, but you can of course stop anywhere you wish.

EVERYTHING in a REAL DRIVE advanced scenario is randomized (except the route of the player train). Just the combinations of places where you might be stopped by a red signal can exceed millions of permutations. All trains and rolling stock on sidings are random generated too. Just like in real life the railroad line can be busy or not so busy. Ofcourse it can also happen (very rarely) that the line is free all the way.

If you are stuck for more than 3 minutes behind a red signal, use TAB to request pass signal at danger.

Note for the Zürich Olten route:

Since the signals blocks are mostly very short, particularly the sections with N signals, you may often experience getting a distant warning of red, only to find the main signal cleared. This is simply because the shorter the signal block, the faster the train ahead will clear the block.

# REAL DRIVE advanced. 4 drives for the Zürich Olten route

Since there is not much Swiss freeware, and since i don't want you to be dependent on too much payware to play these drives, i've used the Re460 for both passenger trains (completely realistic) and freight trains (not totally unrealistic but pretty rare in real life). Deutsche Bahn also run freight services in Switzerland so you will see DB engines ahead of freight trains too.

Special note:

The "REAL DRIVE advanced AI traffic preloads.rwp" file will install additional preloads to your railworks folder. This means that your normal quick drives for this route will also get more varied AI traffic. Allow installation of ALL assets, otherwise the REAL DRIVE will NOT work.

Tip: Start by pushing the random button, then the train route etc... That way even the weather, time of day etc will be random.

Thanks to TRAIN TEAM BERLIN for allowing the Blindzug to be distributed freely.

Thanks to Andreas Ladefoged (Forcesius) for the slow invisible train.

The nerdy stuff (you can skip reading this):

If you are familiar with building quick drive AI preloads and you wish to have even more varied AI traffic, these are the spawn categories used.

Regional - for regional trains

Intercity - For intercity trains

Passenger Scrap - DO NOT USE THIS, it is used for the trains that generate red signals!

Freight: Coal, Gravel, Oil, Container, Scrap - Freight trains

Costum 1 - Long freight trains.

Freight Livestock - Single engines plus one freight wagon shunting trains

Freight Nuclear Flask - Single engine consists

Costum 3 - single freight wagon consists

Costum 5 - freight wagon consists

Costum 6 - Passenger wagon consists

# REAL DRIVE advanced. 4 drives for the Zürich Olten route

Costum 7 - DO NOT USE THIS, it is used for the trains that generate red signals!

Costum 8 - DO NOT USE THIS, it is used for the trains that generate red signals!
