

# Class 66 Light-Update

Please note:

- RailWorks 3 light update for the class 66 repaints from Paul S. and newS.
- The default German PZB script is included for each repaint (except for SNCF liveries).
- There is an additional version of the light update for all owners of the **Class 66 Sound Pack** from *Armstrong Powerhouse* (where is the two-tone horn included). Pay attention to the installation note.

Repaints:

- Here are all repaints listed which will get the light update:
  - <http://www.dw-agency.de/routes/class66/lights/>

Installation:

1. Open the folder **Class 66 Lights** which you can found in the unzipped download.
  2. Copy and paste the **Assets** folder into your RailWorks folder:  
...\\Steam\\SteamApps\\common\\railworks\\. Overwrite all existing files.
  3. Clear cache!
- ➔ If you have the **Class 66 Sound Pack** from *Armstrong Powerhouse*, open the folder **Class 66 Lights - AP Sound** and copy & paste the Assets folder you can found in it.

Thanks to Paul S.!
