Livery Pack - MeshTools Class 50 #1
V1.1.3

Four of the six repaints contained in this pack created by NattyDredd (plough by Will)

Contents

Welcome!

This pack is part of a community project started by members of the UKTrainSim community. Our aims are simple:

- Build up a bank of resources for the community by combining skills and working together
- Make the packs simple and straight forward to use

What is in this pack?

- 10 repaints of the MeshTools Class 50 locomotive (available from Steam). This pack does NOT work with the original MeshTools Class 50 sold directly through MeshTools.
- Quick Drive conists kindly created and donated by pjt1974.
- 1 "bonus" scenario by bdy26. To play this scenario you also need the UKTrainSim - UK Carriages #1 pack.

What DLC is needed?

The only item of DLC required is the MeshTools Class 50 from Steam. Without this this pack can NOT be used. If you wish to use the QuickDrive conists and play the included scenario then you also need the UKTS Freeware Pack Carriages #1 pack and also Wagons #1.

Do I have the latest pack installed?

Every time you install a UKTS Freeware Pack it will automatically check to see if a more up-to-date version is available and warn you if you are trying to install an obsolete pack.

A small utility called "*UKTrainSim Freeware Pack Updater*" is also installed with every pack. This utility will allow you to quickly and easily check if updates for any of your packs are available. It also lists packs that you do not have with straight forward links to click and download them.

How do I use the content in this pack?

A gallery of images showing the items available in each pack can be accessed by visiting:

http://www.uktrainsim.com/FreewarePacks/galleries

A Google Documents spread sheet is available which gives further details of all the assets included in each pack.

View Google Documents Spread sheet

How do I Use the content in this pack?

A YouTube video has also been created which shows you how to enable object set filters and find the content in each pack.

View YouTube Tutorial Video

Object Set Filters required for this pack

The following Developer and Product Filters must be enabled to use the content of this pack when creating scenarios:

- MichaelWhiteley → Class 50

How can I get involved?

There are many ways members can take part in the project:

- Donate a new asset to the pack
- Donate a re-skin to the pack
- Research buildings, objects etc. to assist object creators
- Take pictures that can be used as texture resources
- Assist with the organisation of the packs
- Create tutorials to assist other members

If you have questions or want more information please visit the Get Involved page on the UKTrainSim Freeware Packs web site.

Bonus scenario included

- Ben Yates (bdy26) donated a scenario to the pack allowing you to get straight down to business with the class 50 repaints. To use this scenario you also need the UKTrainSim - UK Carriages #1 pack.

The Thames Valley Royal by bdy26

Single Part Scenario

Route:	Oxford to Paddington	**Year:**	1992
Author:	bdy26	**Season:**	Spring
Duration:	25mins	**Weather:**	Stormy, Heavy Rain
Difficulty:	Easy (1)	**Player Engine:**	Diesel: Class 50 NSE

Description: Drive a relief service to Oxford. It's a stinker of an evening in late February 1992

Briefing: You will have a few minutes wait on Didcot station for your service. Follow the instructions within the scenario.

Conditions of Use

Anyone using content in the freeware packs must not do anything that would break the "Licensing Conditions for Donated Content". In addition to this the following conditions also apply:

- Content may **NOT** be used to make profit. This includes (but is not limited to) using content as a requirement, dependency or packaging with any payware, donationware or profit making items without the express permission being granted by the author of the assets
- You may re-skin, distribute and re-package content with any freeware route or project but where possible you should list the relevant Freeware Pack as a requirement for a route, scenario etc rather than including the content with your route

These conditions are designed to ensure that content donated freely by members of the community remains free. Respect other people's work and do not put the future of the packs at risk by careless actions.

Licensing Conditions for Donated Content

To ensure that assets remain permanently available to route builders once donated, contributors must agree to the following conditions:

- Content may NOT be withdrawn from the pack after it has been donated
- All content may be used, distributed, re-skinned and re-packaged with any freeware route.
- The complete pack may be hosted on any website providing no profit is made by offering the download
- The content may be edited by a Freeware Pack administrator so that it fits in with the standardised pack structure
- The content may be edited by a Freeware Pack administrator to improve the realism of the item. This is primarily used for rolling stock donations and their physics (braking, loading etc parameters).
  You may opt out of this condition if you do not want any improvements to be made to your donations by informing a Freeware Pack administrator
- Freeware Packs may be distributed on UKTS CD's to provide an alternative to those without broadband Internet access and so they may be given away at UKTS Live events

These conditions will allow us to create a reliable, simple and completely free resource for the community. For the latest conditions visit http://www.uktrainsim.com/FreewarePacks.

Licensing Conditions for Hosting Packs

The following conditions apply to anyone wishing to host the packs on a site other than UKTS:

- **Permission must be granted by UKTS before packs may be hosted on alternative sites**
- The download must be available for free
- No profit may be made by offering the download
- A link to the original UKTS download must be provided on the download page
- The date and version number of the pack must be clearly given on the download page
- You must email FreewarePacks@rwdecal.co.uk supplying a valid email address and link to the download – This will ensure we can contact you (the host) when a new version is released making it easy for you to update your download

- You must remove the download at the request of a UKTS Freeware Pack administrator

These conditions ensure users can obtain free and consistent packs. For the latest conditions visit http://www.uktrainsim.com/FreewarePacks.

Credits

These packs would have been impossible without members of the community generously donating their time, energy, skill and expertise to the project.

My thanks go to Mike Simpson for his indispensable RWTools, David Richardson for his design skills and Matt Peddlesden for his support. Kariban and Kromaatikse have done incredible work with rolling stock physics and many others have offered help and assistance along the way. Without you all this would not have been possible.

Donations for this pack were received from (alphabetical order):

- bdy26

- NattyDredd
- pjt1974
- Will

Version History

1.0.1 – 14th March 2012
