UK Carriages #1
V1.1.2

A set of Maroon Mk1's ready for work – donated by bdy26

Contents

Welcome!

This pack is part of a community project started by members of the UKTrainSim community. Our aims are simple:

- Build up a bank of resources for the community by combining skills and working together
- Make the packs simple and straight forward to use

Do I have the latest pack installed?

Every time you install a UKTS Freeware Pack it will automatically check to see if a more up-to-date version is available and warn you if you are trying to install an obsolete pack.

A small utility called "*UKTrainSim Freeware Pack Updater*" is also installed with every pack. This utility will allow you to quickly and easily check if updates for any of your packs are available. It also lists packs that you do not have with straight forward links to click and download them

How can I find out what is in this pack?

A gallery of images showing the items available in each pack can be accessed by visiting:

uktrainsim.com/FreewarePacks/galleries

A Google Documents spread sheet is available which gives further details of all the rolling stock included in each pack.

View Google Documents Spread sheet

Scenario Creators – Find the Rolling Stock you Want Quickly

All items in the UKTS Freeware Rolling Stock packs have standardised names. Due to the limited space available to display asset names in game a system of short hand codes is used. A "Quick Reference" of the codes is installed in the same folder as this manual and is also available online. There is also a YouTube video which shows how to enable and find the content in each pack.

Object Set Filters Required for This Pack

The following Developer and Product Filters must be enabled to use the content of this pack when creating scenarios:

- Kuju → RailSimulator
- Newbouy → Addon

How Can I Get Involved?

There are many ways members can take part in the project:

- Donate a new asset to the pack
- Donate a re-skin to the pack
- Research buildings, objects etc. to assist object creators
- Take pictures that can be used as texture resources
- Assist with the organisation of the packs
- Create tutorials to assist other members

If you have questions or want more information please visit the Get Involved page on the UKTrainSim Freeware Packs web site.

Known Problems

Duplicate Loco Numbers SBHH

This is a known issue with Railworks2 where it will quite happily allow duplicate loco numbers that are specified in the loco .bin files within the editor, but then throws a SBHH error once you click the play button **or** exit out of the editor and then try to launch a scenario via the main route window.

Work Around
Scenario creators should be careful not to place more than one item of any locomotive which is a singled numbered or named type.

Conditions of Use

Anyone using content in the freeware packs must not do anything that would break the "Licensing Conditions for Donated Content". In addition to this the following conditions also apply:

- Content may **NOT** be used to make profit. This includes (but is not limited to) using content as a requirement, dependency or packaging with any payware, donationware or profit making items without the express permission being granted by the author of the assets
- You may re-skin, distribute and re-package content with any freeware route or project but where possible you should list the relevant Freeware Pack as a requirement for a route, scenario etc rather than including the content with your route
These conditions are designed to ensure that content donated freely by members of the community remains free. Respect other people's work and do not put the future of the packs at risk by careless actions.

Licensing Conditions for Donated Content

To ensure that assets remain permanently available to route builders once donated contributors must agree to the following conditions:

- Content may NOT be withdrawn from the pack after it has been donated
- All content may be used, distributed, re-skinned and re-packaged with any freeware route.

- The complete pack may be hosted on any website providing no profit is made by offering the download
- The content may be edited by a Freeware Pack administrator so that it fits in with the standardised pack structure
- The content may be edited by a Freeware Pack administrator to improve the realism of the item. This is primarily used for rolling stock donations and their physics (braking, loading etc parameters).
  You may opt out of this condition if you do not want any improvements to be made to your donations by informing a Freeware Pack administrator
- Freeware Packs may be distributed on UKTS CD's to provide an alternative to those without broadband Internet access and so they may be given away at UKTS Live events
These conditions will allow us to create a reliable, simple and completely free resource for the community. For the latest conditions visit http://www.uktrainsim.com/FreewarePacks.

Licensing Conditions for Hosting Packs

The following conditions apply to anyone wishing to host the packs on a site other than UKTS:

- **Permission must be granted by UKTS before packs may be hosted on alternative sites**
- The download must be available for free
- No profit may be made by offering the download
- A link to the original UKTS download must be provided on the download page
- The date and version number of the pack must be clearly given on the download page
- You must email FreewarePacks@rwdecal.co.uk supplying a valid email address and link to the download - This ensure we can contact you (the host) when a new version is released making it easy for you to update your download
- You must remove the download at the request of a UKTS Freeware Pack administrator

These conditions ensure users can obtain free and consistent packs. For the latest conditions visit http://www.uktrainsim.com/FreewarePacks.

Credits

These packs would have been impossible without members of the community generously donating their time, energy, skill and expertise to the project.

My thanks go to Mike Simpson for his indispensable RWTools, David Richardson for his design skills and Matt Peddlesden for his support. Kariban and Kromaatikse have done incredible work with rolling stock physics and many others have offered help and assistance along the way. Without you all this would not have been possible.

Donations for this pack were received from (alphabetical order):

- 47815
- bdy26
- DavidHossack
- Newbouy
- Sdark2
- Slammer423
- Tankski

- Will

Version History

1.0.2 – 17th August 2011
1st public release.

1.0.3 – 30th August 2011
- Added version history to manuals
- Fixes to registry utility button
- Improved version detection script to prevent installer crashing
- Tweaks to updater program
- Warning popup added to uninstall routine informing users that removal of rolling stock may prevent scenarios which use them from working
- Additional Content Added:
  o **UKTS 24817**: TPO NSX BR Coaches by newbouy
  o **UKTS 24353**: Royal Mail TPO NSA Coaches by newbouy

1.0.4 – 1st October 2011
- Added new version of updater program
- Modified installer to allow packs to contain the same asset if needed
- Additional Content Added:
  o **UKTS 27347:** Maroon Mk1 Pack by Vulcan Productions (Ash Burgess)

1.1.0 – 23rd December 2011
- Renamed all items using the new naming system
- Reduced uninstall footprint significantly by storing data separate to installer code
- Additional Content Added:
  o **UKTS 25157:** East Coast Carriages by 47815
  o **UKTS 27529:** Carmine and Cream Mk1s (TS2012 model) by bdy26
  o **UKTS 27530:** Chocolate and Cream Mk1s (TS2012 model) by bdy26
  o **UKTS 27886:** Mk1 BG Variety pack (TS2012 model) by bdy26

1.1.1 – 17th March 2012
- New installer with improved dialogues and options for the user
- Additional Content Added:
  o **UKTS 28277:** BR MK2B Coaching Pack for UKTS by bdy26
  o **UKTS 28467:** TS2012 Mk1 & Mk2 NSE Variety pack for Railworks by bdy26

1.1.2 – 24th April 2012
- Fixed missing textures on BlueGrey Mk2 BSO and BFK by bdy26 (thanks to davejc64 for spotting and reporting)
- Renamed EastCoast stock to ECoast in-line with other East Coast items
- Additional content added:
  o **UKTS 28602:** GNER HST Repaint by davidhossack
  o **UKTS 28606:** East Coast Interim HST Repaint by davidhossack
  o **UKTS 28607:** National Express East Coast Interim HST Repaint by davidhossack
