The folder contains 2 Vectron 191 Locomotives

In particular inside the pack you will find:

N. 1 Locomotive InRail Vectron 191 001 10th Anniversary

N. 1 Locomotive Locoitalia InRail Vectron 191 103

INSTALLATION:
Extract the file "Pack InRail 191 001.rar" to a temporary folder.
Install Pack InRail 191 001.rwp with Utilities.exe
Copy "191 001 InRail GeoPcDx Installer.bat" into the /RailWorks/Assets/ folder and run it.
The installer will automatically search for the appropriate files.
Empty the cache and drive the train.
REQUIREMENTS:
For correct operation you need Vectron Version - BR 193 AC/DC Advance:
https://www.rsslo.com/locomotives/
https://www.railtraction.eu/db-vectron.html
IMPORTANT:
In order to use this model, you must do nothing more than activate BR193 of RSSLO.
Note: Preloads and locomotive are under the prefix [PD].
