

"Railpool has decided to make one of its locomotives available to DB Netze. 193 813 got a new paint job for this transformation, which is quite unique. The locomotive is now blue and gray and depicts, next to the initiators' logos, the landmarks of each city where an NLZ / BZ is located (2x Frankfurt am Main, Karlsruhe, Duisburg, Hannover, Leipzig, Munich and the S-Bahn-Berlin)."

Author Repaint - Pasquale D'Alessandro

INSTALLATION:

Extract the file "DB Netze 193 813.rar" to a temporary folder. Install DB Netze 193 813.rwp with Utilities.exe

Copy "193813 DB GeoPcDx Installer.bat" into the /RailWorks/Assets/ folder and run it.

The installer will automatically search for the appropriate files.

Empty the cache and drive the train.

REQUIREMENTS: For correct operation you need Vectron Version - BR 193 AC/DC Advance:

<https://www.rsslo.com/locomotives/>

<https://www.railtraction.eu/db-vectron.html>

IMPORTANT:

In order to use this model, you must do nothing more than activate BR193 of RSSLO.

Note: Preloads and locomotive are under the prefix [PD].
