Hello driver,

today, you will be driving ICE 1058 with a short ICE 1 on the section from Bochum Hbf to Duisburg Hbf. Don't miss the unusual stop in Mülheim. In Duisburg, a colleague will take over the train on its final leg to Köln Hbf. Your departure is at 13:03. Have fun!

The scenario is based on the services that ran on October 17, 2022, but unfortunately cannot be implemented completely realistically due to limitations imposed by the Scenario Planner.

If you don't own one of the optional add-ons, you will have to change or remove the corresponding AI trains yourself in the scenario editor.
