

“vR_Sgss“ Repaint Tutorial

Installation:

Unzip the package and use TS2022 Utilities to install the *.rpw file; alternatively, if you have the "7zFM.exe" programme, open the *.rpw file and extract the contents to the Railwors directory.

GeoPcDX file to be inserted:

All files.GeoPcDx

copy it from the green file path and paste it into the red file path.

Or

click on the file Install_vR_Sgss_Pack.bat in the following path "assets\ vR_AddOn3\": all necessary files will be copied automatically into the respective sub-directory.

Important: in order to use this template, you only have to activate vR_AddOn3\ vR_Sgss.

Have fun.

Pasquale D'Alessandro and Andrea Luigi Gobber

Installazione:

Decomprimere il pacchetto e utilizzate Utilities di TS2022 per installare il file *.rpw; in alternativa, se avete il programma "7zFM.exe" aprite il file *.rpw ed estraete il contenuto nella directory di Railwors.

GeoPcDX file da inserire:

Tutti i files.GeoPcDx

copia dal percorso del file verde e incollalo nel percorso del file rosso.

Oppure

cliccare sul file Install_vR_Sgss_Pack.bat presente nel seguente percorso “assets\
vR_AddOn3\”: tutti i files necessari saranno copiati automaticamente nelle rispettive sub
directory.

Importante: per poter utilizzare questo modello, non si deve fare nient'altro che attivare

vR_AddOn3\ vR_Sgss.

Buon divertimento.

Pasquale D’Alessandro e Andrea Luigi Gobber
