

METROPOLITAN LINE: Signals & Approaches between Finchley Road and Aldgate

Read the Line from bottom to up !!!

- OB2 Signal + Signalnummer (rechts oder links)
- AC10 Approach Control Speed mi/h
- 15 Streckengeschwindigkeit / Beschränkung
- > > 40 Direction of Travel + Track Speed
- TT Back to Regular Track Speed

Because of short distances between signals it is important to reduce speed right instead of watching a yellow signal ! Otherwise you will be not able to stop at red signals !
 Some signals have approach controlled speed, it mean: you must slow down before that signal. If you have fall enough below maximum approach speed, the signla will change shortly before pass to green. If your speed not below enough the signal will not change! At some signals there will be no TAB-function available to pass!
